Year of graduation: 2021
Form of education: Full-time

About myself

Data Analyst and Bachelor of Economics (Belarusian State Economic University).

I possess skills in data management: cleaning, structuring, metric analysis, and visualization. I am especially passionate about working with Python and confidently use SQL for database management and Git for version control. I have experience conducting A/B tests and identifying growth opportunities for businesses.

I aim to develop in the field of data analytics, applying analytical skills and economic knowledge to solve business challenges.
